ECB-3500--Wireless Multi-function 7+1 AP

- Product Features highlight
- Application illustration
- Product Specification
 - HW spec
 - SW spec
- 3 times coverage + 108Mbps throughput

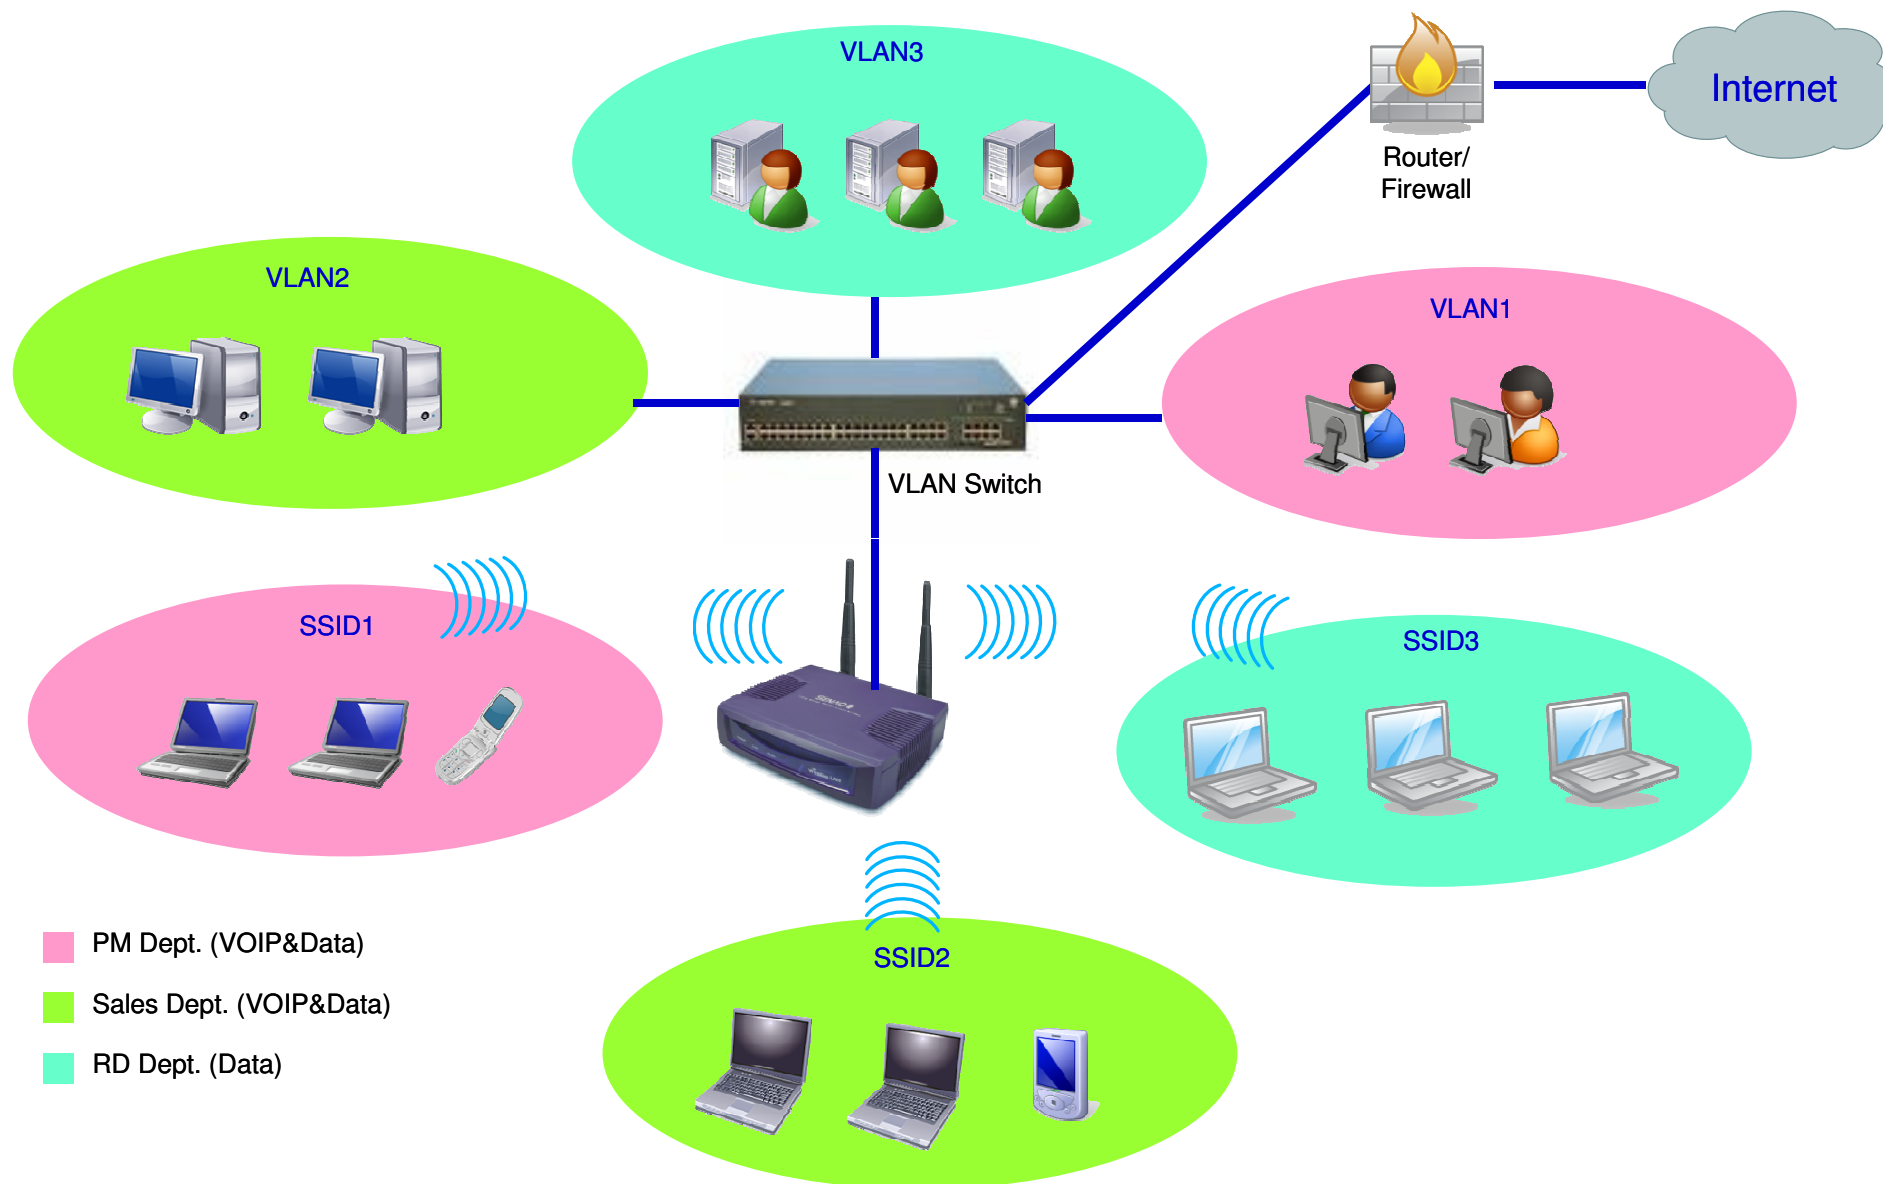

Product Features Highlight

- High output power up to 28dBm (600mW), transmit power controllable
- Super G support, high speed data rate up to 108Mbps
- 7 wireless operating modes support
 - AP/Client Bridge/Repeater/WDS AP/ WDS Bridge/Client Router/AP Router
- Differentiated services with multiple SSIDs
- 802.1x supplicant support (CB mode)
- Detachable antenna / antenna diversity support
- 802.3af PoE support
- QoS (WMM) support

Multi-function: Access Point

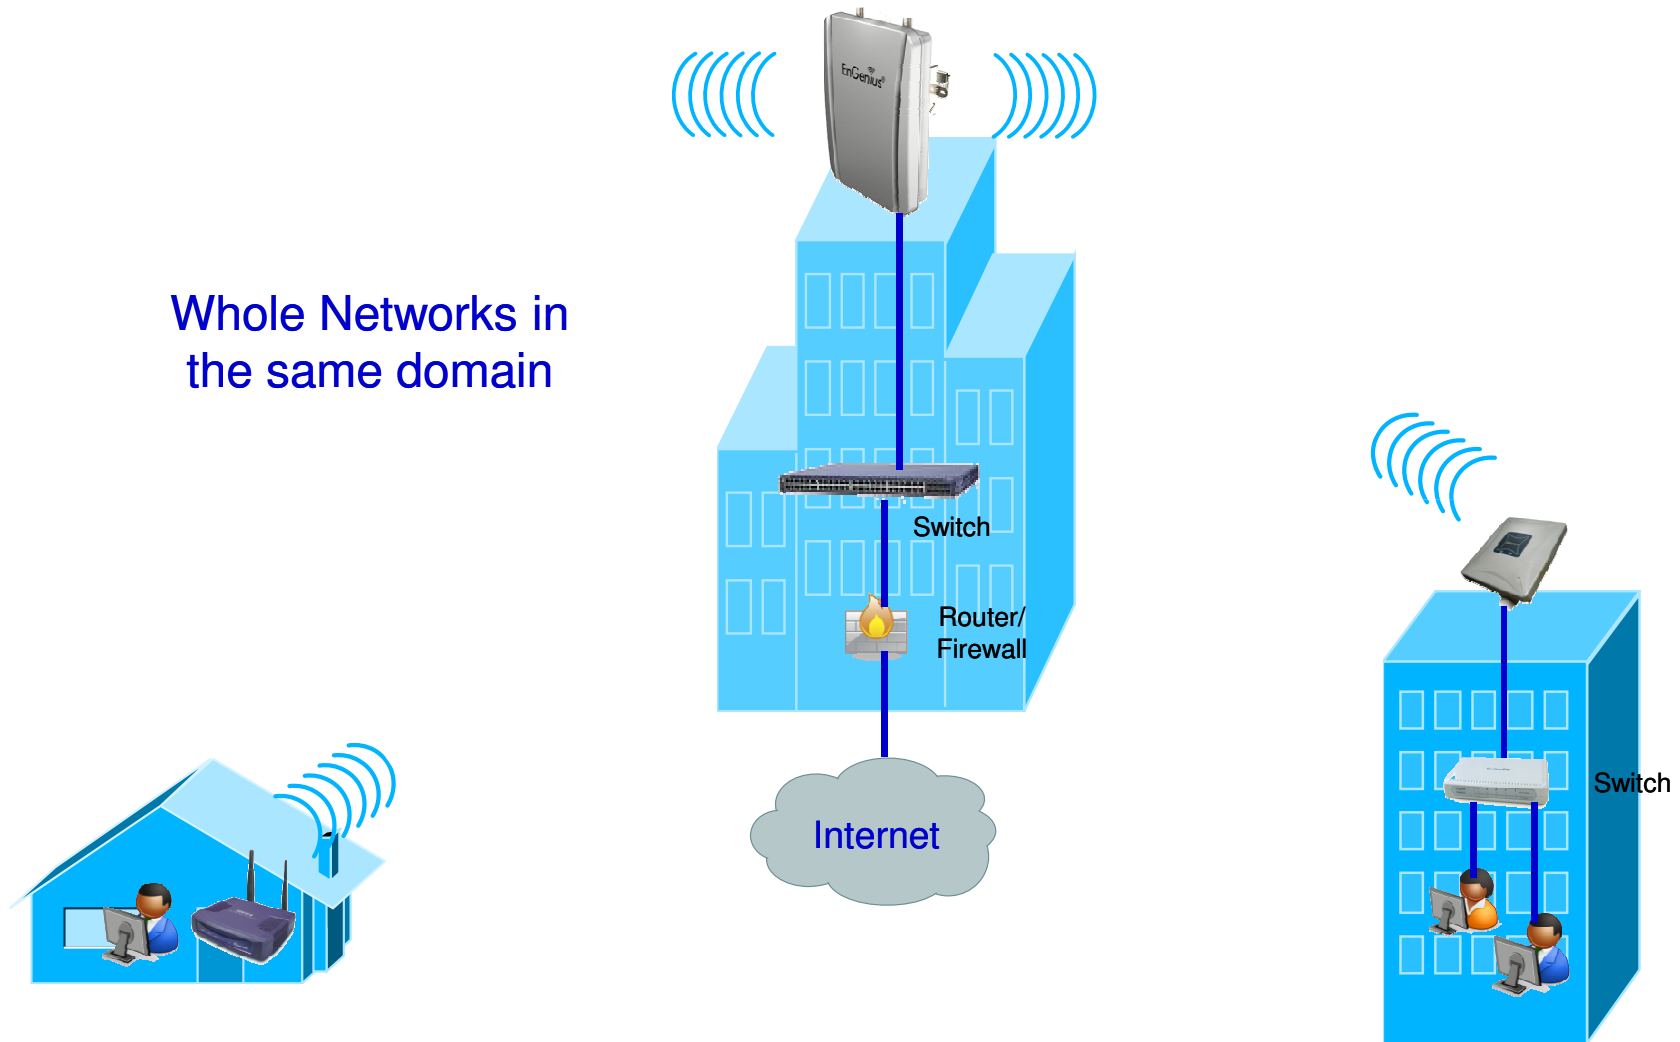

Multi-function: WDS AP

Multi-function: Client Bridge

Whole Networks in
the same domain

Multi-function: WDS Bridge (Transparent)

Full Transparent

Multi-function: Universal Repeater

Range Extender using
the same SSID

Multi-function: Client Router

Different domain
Networks for WISP

Working as a router,
using PPPoE/ DHCP
Client/ Static IP connect
to central side

Working as a router,
using PPPoE/ DHCP
Client/ Static IP connect
to central side

Product Specification

- **Model Name:** ECB3500
 - IEEE 802.11b/g
 - RF Output Power up to 28 dBm
 - Detachable Antenna (TNC Type) for different operation environment
 - Support Diversity function
 - 802.3af PoE support
- **System Architecture:**
 - CPU: AR2316 SoC with built in 2.4GHz radio
 - Memory
 - Flash: 8MB
 - DRAM: 32MB
 - Interface
 - 10/100BaseT Ethernet*1
 - JTAG (for debugging purpose)

- **Operating mode**

- Access Point
- WDS AP
- Client Bridge
- WDS Bridge (Transparent)
- Repeater (Universal Repeater)
- Client Router
- AP Router

- **Security**

- WPA / WPA2/ WEP Encryption support
- 802.1x Authentication support (AP mode)
- 802.1x Supplicant (EAP-TLS/EAP-TTLS/PEAP) (CB mode)
- NAT (Port Forwarding)
- Hide SSID
- L2 Isolation
- MAC address filtering (up to 50)
- Multi-SSID (4 SSID)+VLAN tagging

- **Configuration**

- RSSI indicator
- Act Timeout setting
- Bandwidth selection

- **Management**

- SNMP v1/v2c, MIB I/II and Private MIB Support
- Telnet/ Web configuration
- Bandwidth Measurement
- WAN port Bandwidth management
(Inbound/Outbound Bandwidth Setting)
- Remote HTTP Management
- Web re-direct

Flexible settings in the GUI

Wireless Advanced Settings

HomeReset

Data Rate	Auto
Transmit Power	20 dBm
Fragment Length (256 - 2346)	2346 bytes
RTS/CTS Threshold (1 - 2346)	2346 bytes
Protection Mode	Disable

ApplyCancel

Disable
CTS Only
RTS/CTS

Transmit Power control:

You may have the different application distance of the device.
This feature can be helpful in restricting the coverage area of the wireless network.

RTS Threshold:

Packets over the specified size will use the RTS/CTS mechanism to maintain performance in noisy networks and preventing hidden nodes from degrading the performance.

3 Times Coverage + 108Mbps throughput

High Power AP

28dBm/ 23dBm

High Power USB

High Power AP

28dBm/23dBm

Normal Power USB

Normal Power AP

18dBm/ 18dBm

Normal Power USB

***D (distance)=f (Power, Sensitivity,
Antenna Gain, Cable Loss)***

3 Times Coverage + 108Mbps throughput

Conclusion

- Best choice for enterprise level products
- Transmit longer, speedy and better signal quality.
- 7 wireless modes for different environments.
- EnGenius makes the wireless into practical road for better way of access to Internet.

Q&A
